MINISTER'S MESSAGE

Alberta's exports performed strongly in 1988, as total merchandise exports increased by 11 per cent over 1987 to $13.3 billion. Alberta's service exports also increased by over 21 per cent to $803 million.

Alberta is an active and competitive player in the international trade forum, exporting to over 140 countries. While the United Stated remains the province's biggest customer, exports to other markets have increased significantly. In 1974, non-U.S. exports accounted for less than 5 per cent of total exports; in 1988, they accounted for over 31 per cent, mainly due to gains in Asian markets. Exports to Japan increased by one-third to over $1 billion. Impressive gains were also recorded in sales to the Soviet Union (38 per cent), Iraq (79 per cent), Norway (46 per cent) and France (44 per cent).

While world trade has been steadily expanding in terms of both volume and value of shipments, competitive pressures have caused a number of countries to implement protectionist trade policies. However, the shortcomings of these measures are increasingly being recognized. Through the Multilateral Trade Negotiations under the General Agreement on Tariffs and Trade, concerted efforts are being made to reduce trade barriers and expand trade. The Canada-U.S. Free Trade Agreement is also enhancing export opportunities for Alberta.

The government of Alberta believes exports are an important component of sustained economic growth. We hope this publication will provide useful information to Alberta businesses aiming to expand their international sales and to those just now entering the world marketplace.

Peter Elzinga

Peter Elzinga, Minister
Alberta Economic Development and Trade

1985-88 Exports to Other Countries 181

1988 Exports to Alberta's Major Trading Partners (000's) 183

INTRODUCTION

International trade is vitally important to the Alberta economy. Alberta's exports of goods and services increased by 11.5% to $14,087 million in 1988. This represented 22.5% of the province's gross domestic product. In terms of per capita exports, Alberta ranks significantly ahead of five of the seven major western economies.

Alberta's merchandise exports totalled $13,284 million in 1988, an 11% gain over 1987. Service exports for 1988 amounted to an estimated $803 million, a rise of 21% from the previous year. Tourism accounted for roughly 70% of Alberta's service exports in 1988.

Alberta exported to over 140 countries in 1988, as it continued to diversify its foreign markets. Although the United States remains the largest export market, Alberta's dependence upon American buyers has been gradually decreasing. In 1974, more than 95% of the province's exports went to the U.S. and in 1980, the U.S. share was still over 89%. This was reduced to 71.9% in 1987 and further to 68.7% in 1988.

Alberta is part of what can increasingly be termed a global economy. The international marketplace is dynamic and growing. According to the General Agreement on Tariffs and Trade (GATT), world merchandise trade volume expanded by an estimated 8.5% in 1988, contributing to a 14% increase in world commodity trade value to $2.84 trillion. The 1988 trade growth was broadly-based in terms of commodity groups as well as countries. Export and import volumes of developing nations both increased by a larger percentage than those for developed nations.

GATT has made the significant observation that 1988 was the sixth consecutive year in which world trade grew more rapidly than world production. Clearly, the international marketplace offers strong potential for increased export growth, and Alberta is well positioned to tap that potential.

Exports* as a Percentage of GDP

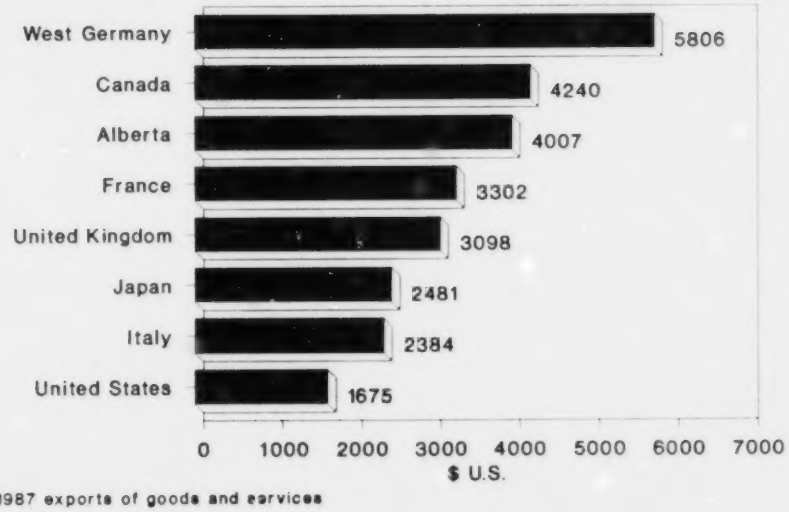
Exports Per Capita
($ U.S.)*



* 1987 exports of goods and services

ABOUT THE DATA

This publication is intended to provide a convenient data source for Alberta's international trade in goods. For each country to which Alberta exports at least $1 million in merchandise, the top 20 exports to and top 15 imports from are provided, both for Alberta and Canada.* Regional and sectoral tables and highlights are also included.

Beginning in 1988, Statistics Canada changed its trade commodity nomenclature to that of the international Harmonized System. As a result, comparative data on an itemized basis with previous years is not available. As such, the export and import tables for each country contain only 1988 data. Also, comparative total import tables have not been included because Statistics Canada has changed its import methodology to reflect country of product origin rather than country of consignment/export. Beginning again with the 1989 International Trade Review, comparative tables will be provided.

Statistics Canada is the primary data source for this publication. Alberta Agriculture publishes export statistics for agricultural commodities using a different nomenclature, and for some products, has calculated its own export estimates using a different methodology than Statistics Canada. For these products, this publication uses the Alberta Agriculture estimates.

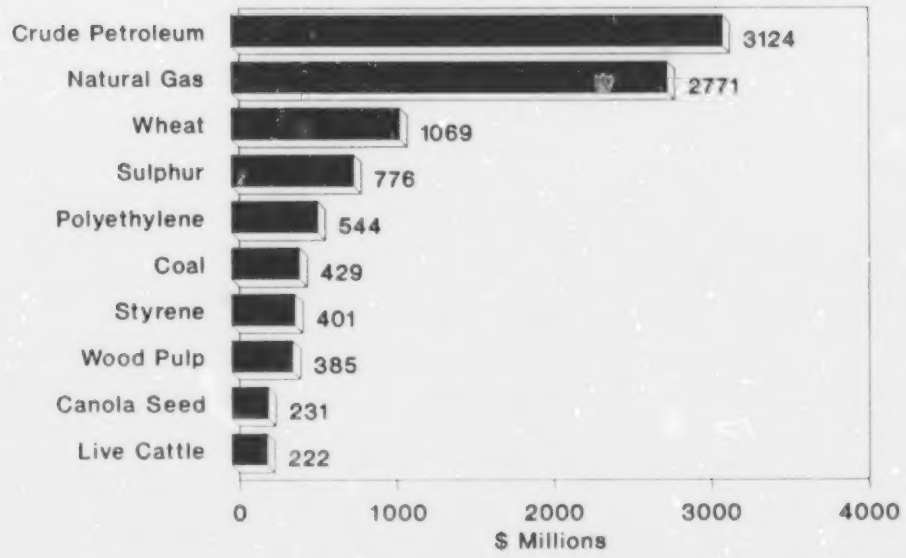
The term "exports" refers to "domestic exports": goods grown, extracted or manufactured in Alberta or Canada, as the case may be, and includes goods of foreign origin which have been materially transformed in Alberta/Canada and then exported. For Canada, "imports" include all goods which have crossed its territorial boundary, whether for immediate consumption or storage in bonded Customs warehouses. For Alberta, the import statistics are on a province-of-clearance basis, which means that the goods cleared Customs in Alberta either for immediate consumption or for entry into a bonded Customs warehouse. However, this does not always coincide with the province in which the goods are consumed. Because Alberta is an inland province, its import statistics will in many cases be understated.

It should be noted that the export value for a particular commodity will often include a cost component for transportation to the Canadian port of exit. This is usually the case with overseas shipments. Exports to the U.S. are generally valued free on board at place of lading, net of freight charges, discounts and allowances.

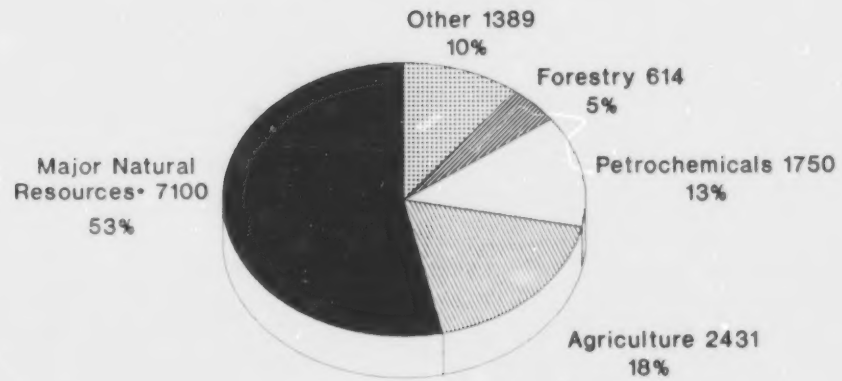
Unfortunately, service exports cannot be included on a country-specific basis, as such data is not presently available. Total service (including tourism) exports have, however, been provided in the introduction to this publication. Hereafter, in this document, "exports" will refer strictly to merchandise exports.

* However, commodities with export/import values of less than $500 are not shown.

Alberta's Top Ten Export Commodities
1988 ($ Millions)



Alberta Exports by Major Industry Sector
1988 ($ Millions)



• crude oil, natural gas, sulphur, coal

ALBERTA EXPORTS BY COMMODITY

Eight of the top ten exports exhibited vigorous growth in 1988 over 1987. Crude petroleum and natural gas remained the two top export commodities respectively. However, oil's share of total exports dropped significantly from 30.3% in 1987 to 23.5% in 1988, while that for natural gas increased slightly from 19.3% to 20.9%. Exports of wheat surged by 58% to $1,069 million, making it the third largest export commodity in 1988, replacing sulphur, exports of which diminished by 7% to $777 million. Polyethylene made impressive gains in 1988, with exports expanding by 71% to $544 million, as this petrochemical product became the number five export commodity for Alberta. Exports of coal rose 16% to $429 million. Although statistics specifically for styrene were not available in 1987, it is estimated that exports roughly doubled between 1987 and 1988 to $401 million. Exports of wood pulp grew by 31% to $385 million. Canola seed exports increased by 20% to $231 million. Exports of live cattle more than doubled to $222 million.

Top 10 Alberta Commodity Exports 1988
($000's)

		% OF TOTAL
1. Crude Petroleum	3,124,359	23.5
2. Natural Gas	2,770,849	20.9
3. Wheat	1,069,024	8.1
4. Sulphur	777,137	5.9
5. Polyethylene	544,272	4.1
6. Coal	428,965	3.2
7. Styrene	401,452	3.0
8. Wood Pulp	385,364	2.9
9. Canola Seed	230,629	1.7
10. Live Cattle	222,273	1.7
Total Above	**9,954,324**	**75.0**
Total All Exports	**13,283,514**	**100.0**

Non-Renewable Natural Resources

Alberta's exports of major non-renewable natural resource products decreased slightly from $7,133 million in 1987 to $7,100 million in 1988. More significantly, the share of total exports contributed by these non-renewable natural resources decreased from 60% in 1987 to 53% in 1988, pointing to a lessening dependency on these commodities and a further diversification of the provincial economy.

Alberta's Exports of Major Non-Renewable Natural Resource Products ($000's)

	1987	1988	% Change
Crude Petroleum	3,622,978	3,124,359	-13.8
Natural Gas	2,306,645	2,770,849	20.1
Sulphur	832,115	776,242	- 6.7
Coal	370,968	428,965	15.6
Total	**7,132,706**	**7,100,415**	**- 0.5**

In 1988, the average spot-market price for the benchmark West Texas Intermediate crude oil decreased to $15.98 per barrel from $19.17 in 1987. The drop in world oil prices contributed to the decreased export value of crude petroleum in 1988, although the volume exported increased by 19%. 98.5% of the oil exports went to the United States.

Natural gas export volumes expanded by 37% from 1987 to 1988, contributing to a rise in export sales of 20%. The increased exports resulted from greater U.S. gas demand in response to unusual weather conditions and environmental concerns, more aggressive marketing by Alberta producers, and improved access to U.S. pipeline facilities. Because the increase in exported volume was primarily localized in the less lucrative U.S. midwest region, the average export price decreased. All of Alberta's natural gas exports are shipped to the U.S.

Canada is the world's leading sulphur exporter, and Alberta accounts for nearly 95% of Canada's sulphur production, most of which is recovered as a by-product of natural gas processing. Most of Alberta's production is marketed offshore, primarily to make phosphoric acid which is used to manufacture phosphate fertilizer. As such, sulphur exports tend to be closely linked with demand for agricultural commodities. Morocco was by far the largest market for Alberta sulphur, with the United States second.

In 1988, Alberta coal producers enjoyed a record year for both production and export volumes. Japan continued to be the chief market, buying 74% of Alberta's coal exports. South Korea and Brazil were the second and third largest markets, respectively.

AGRICULTURE

Total agricultural exports increased by a third over 1987 to a record $2,431 million. Agricultural commodities accounted for 18% of total Alberta exports in 1988, up from 15% the previous year. These gains were led by the $392 million increase in wheat exports and the doubling of live cattle exports.

The surge in wheat export values was largely accountable to price increases fueled by international drought concerns. The People's Republic of China was the largest customer for Alberta wheat, importing $435 million, or 41% of the total, as that country found its supplies limited as a result of policies which promoted the production of non-cereal crops.

The United States purchased over 98% of the $222 million in live cattle exports from Alberta. The doubling of export value was essentially accounted for by the doubling of export volumes.

Live hog exports more than quadrupled in terms of quantity and nearly quadrupled in value from 1987 to 1988. This was partly due to temporary slaughter capacity constraints resulting from a labour dispute and to high demand for slaughter hogs in the U.S.

Exports of canola oil increased by half over 1987, partly in response to the growing recognition by Americans of the health advantages of this edible oil.

Other strong performers in 1988 were dehydrated alfalfa, which registered a 67% increase in exports to $32.7 million, oilseed cake and meal, which gained 38% to $78 million and linseed, which increased by 58% to $8.3 million.

Agricultural commodities which experienced declines in terms of export values included barley, pork and beef. Barley exports slipped as a result of decreased acreage and higher domestic consumption. Pork exports dropped due to slaughter industry labour problems and record pork production in the U.S. Beef exports decreased primarily in response to the exchange rate appreciation between 1987 and 1988.

Alberta's Top 10 Agricultural Exports
($000's)

	1987	1988	% Change
1. Wheat	677,025	1,068,110	57.8
2. Canola Seed	192,443	230,629	19.8
3. Live Cattle	107,140	222,273	107.5
4. Barley	195,330	143,602	-26.5
5. Raw Hides and Skins	85,333	101,976	19.5
6. Canola Oil/Mustard Oil	60,461	91,551	51.4
7. Oilseed Cake and Meal	56,485	78,182	38.4
8. Beef, Fresh, Frozen or Chilled	70,342	56,353	-19.9
9. Live Hogs	14,938	53,775	260.0
10. Pork, Fresh, Frozen or Chilled	82,600	47,645	-42.3
Total Above	**1,542,097**	**2,094,096**	**35.8**
Total All Agricultural Exports	**1,820,387**	**2,430,625**	**33.5**

FORESTRY

Alberta exports of forest products totalled over $614 million in 1988, an increase of 16% over 1987. Wood pulp accounted for 63% of the total as exports of that product increased by 31%. The United States constituted 95% of Alberta's export market for wood pulp. Lumber exports declined by 24%, due in part to lower U.S. housing demand and the appreciated Canadian dollar. The U.S. purchased 99% of Alberta's lumber exports in 1988. Exports of panel products rose by 57.5% and exports of joinery and other wood products more than quadrupled in 1988.

Alberta's Exports of Forestry Products
($000's)

	1987	1988	% Change
Wood Pulp	293,237	385,364	31.4
Lumber	181,352	138,367	-23.7
Panel Products	52,253	82,304	57.5
Joinery and Other Wood Products	1,893	8,390	343.2
Total	**528,734**	**614,424**	**16.2**

PETROCHEMICALS

Petrochemical exports exhibited remarkable growth from 1987 to 1988, increasing by 46% to approximately $1.75 billion. This performance was led by styrene, exports of which roughly doubled, and polyethylene, for which export receipts rose 71%. The U.S. was the largest buyer of styrene, taking 29% of the total. Over $240 million of styrene, equivalent to 60% of the total, was shipped to Asian Pacific Rim nations. The U.S. purchased 61% of Alberta's polyethylene exports in 1988.

There was strong demand and improved price/cost relationships for both ethane-based and methanol producers in 1988. Plants were operating at or near capacity and there was sustained upward pressure on unit selling prices (e.g., U.S prices for linear low-density polyethylene increased from 37.5 cents/lb. in the 4th quarter of 1987 to 52 cents/lb. in the 4th quarter of 1988; styrene prices went from 40 cents/lb. to 47 cents/lb. over the same period). This contributed to an upswing in production and to the export gains mentioned.

Alberta's Top 10 Petrochemical Exports 1988
($000's)

1.	Polyethylene	543,976

9.	Ethylene-Vinyl Acetate Copolymers	40,921
10.	Pentaerythritol	24,590
	Total Above Commodities	1,631,373
	Total All Petrochemical Exports approx.	$1.75 billion

ALBERTA EXPORTS BY COUNTRY AND REGION

Alberta exported to over 140 countries in 1988. The statistics point to increasing diversification of Alberta's export markets. In 1974, only 5% of the province's international exports went to non-U.S. destinations. This was increased to 28% in 1987. In 1988, even though exports to the U.S. expanded by 6%, international shipments to non-U.S. buyers increased to 31.3%.

The top seven country markets remained in their same respective positions as in 1987. Exports to China again more than doubled. Exports to Japan, the U.S.S.R. and the Netherlands all increased by more than a third over the previous year. Brazil continued its steady decline as an Alberta export market, dropping from the fifth largest in 1985 to number ten in 1988.

Alberta's Top 10 Export Markets 1988
($000's)

	1987	% of Total	1988	% of Total	% Change (87-88)

United States

68.7% of Alberta's exports went to the U.S. in 1988. While oil and gas remain the two major exports, Alberta's dependence on these two commodities for export revenue is diminishing. Together they represented 64% of the total value of exports to the U.S. in 1988, compared with nearly 69% the previous year and 73% in 1985. Wood pulp remained the third most important export to the U.S. Polyethylene was the fourth largest export product, with sales to the U.S. increasing by 68% to $333 million. American buyers were responsible for the doubling of Alberta's live cattle exports in 1988, as they bought $219 million worth of the $222 million of cattle the province exported.

The following table shows the total value of Alberta exports to each U.S. state in 1988. Users should be cautioned that the totals for some of the states will be underestimated, while those for some others will be overstated. This is because U.S. imports of Alberta crude petroleum and natural gas appear to be primarily credited to the state where the pipeline first crosses into the U.S. Therefore, Washington is shown as importing half of Alberta's natural gas exports, while California, which is actually a major buyer of Alberta natural gas, is shown as importing none.

Alberta exported to every U.S. state in 1988, shipping more than $1 million of products to each. Washington was credited with receiving the most Alberta exports (almost one-fifth of Alberta's total to the U.S). Three-quarters of the export value to Washington State was contributed by natural gas ($1,355 million). Washington also purchased nearly 60% of Alberta's live cattle exports to the States.

Minnesota was the second largest market for Alberta among the U.S. states, receiving $1,269 million in goods. Nearly two-thirds of the total was comprised of deliveries of crude petroleum, while a further 22% was of natural gas.

Illinois buyers purchased $983 million of Alberta products in 1988, making it the number three U.S. state market. Crude oil accounted for four-fifths of this total ($778 million).

New York state, which imported $915 million of Alberta merchandise in 1988, occupied the number four position among U.S destinations for Alberta exports. Natural gas was the top export commodity to New York ($526 million) followed by crude oil ($259 million) and wood pulp ($50 million).

Indiana was the fifth largest export market among the U.S. states, buying $595 million of Alberta commodities. 92% of this total ($546 million) was comprised of crude oil deliveries. Liquified butanes ($16.5 million) was the second largest Alberta export to Indiana.

As the above-mentioned statistics seem to suggest, the largest export markets among U.S. states are not necessarily the most diverse in terms of the distribution of goods. In terms of total number of different commodities imported from Alberta, California ranked first by a significant margin, even though in total value of imports from Alberta ($294 million) it stood eighth. Again, however, the total figure is understated. Leaving aside oil and gas, the top export commodity to California was wood particle board ($37 million) followed by polyethylene ($32.3 million) and wood pulp ($26.6 million).

Washington and Texas were equally diversified markets, second to California in that respect, although in terms of value, Washington purchased nine times more of Alberta products than Texas. The number one export to Texas was methanol ($51.2 million), followed by liquified ethylene, propylene, butylene and butadiene ($26.4 million). Texas was also the largest international buyer for Alberta exports of components for radio, television, radar and related items ($15.3 million).

Montana was the fourth most diversified U.S. market, followed by Minnesota, Illinois, New York State, Colorado, Oregon, and Ohio. Interestingly, Alaska, which was 36th as an Alberta export market in terms of value ($14.2 million) was a more diversified market than Indiana, which was the fifth most lucrative state ($595 million).

	Total				**9,122,384**

Asia

Exports to Asia amounted to $2.5 billion in 1988, a 40% expansion over 1987, making this the fastest-growing export region for Alberta. The People's Republic of China led the way, increasing its purchase of Alberta products by 112% over 1987. Japanese imports of Alberta goods increased by 34% over the previous year. Other strong performances occurred with respect to India (76% increase), Thailand (43%) and the Philippines (31.5%). Thirteen of the nineteen nations within this region which purchased Alberta merchandise in 1988 increased their imports from the province, including the top eight.

Exports to Japan passed the $1 billion level for the first time ever in 1988. Coal was again the top export ($316 million, an increase of 17% over 1987). Canola seed repeated as the second most important exported commodity ($205.6 million, an increase of 41% over the previous year). Wheat remained the number three export to Japan ($71.8 million, an increase of 20%).

Chinese imports of Alberta wheat increased by 44% in volume terms and nearly tripled in dollar terms to $434 million in 1988. Wheat represented 68% of the value of Alberta exports to the People's Republic of China. Polyethylene exports nearly doubled from $75 million in 1987 to $142 million in 1988.

Exports to South Korea increased by 9.5% to $321 million in 1988. Styrene replaced coal as the number one commodity export ($84.3 million). Coal exports, however, did increase by 5.7% to $70.6 million. Exports of sulphur remained at essentially the same level as in the previous year, declining only marginally to $55.3 million.

Taiwan increased its imports of Alberta products by 20% over 1987. Styrene was the number one export to that country in 1988 ($74 million). Taiwan was by far the largest importer of raw hides and skins from Alberta ($38 million). Sulphur was the third most important export to Taiwan ($16.2 million).

Exports to Indonesia increased by 16% to $77.3 million in 1988. Sulphur was the most important commodity shipped there, as it had been the previous three years. However, Indonesia became a more diversified market in 1988, as sulphur's share of total Alberta exports to that country decreased from 57% in 1987 to 32%. Exports of wheat nearly tripled to $14.6 million, and exports of polyethylene increased by 145% to $8.5 million.

Exports to India expanded by 76% to $65.8 million in 1988. The primary reason for this large gain was the 124% surge in canola/mustard oil exports to $33.3 million. However, India also became a more balanced export market for Alberta. In 1987, there were three commodities which Alberta exported more than $1 million of to India. In 1988, there were seven. Included in the 1988 total were $2.3 million in wheat exports, and $2.54 million in wood pulp exports, neither of which were imported from Alberta by India in 1987.

Exports to Thailand increased by 43% to $37 million in 1988. The top export to this country was styrene ($13 million). Crude oil, the second most important commodity ($5.6 million), was not even exported to Thailand in 1987. Polyethylene exports to Thailand more than doubled to $4.7 million, making it the third top export to this country in 1988.

WESTERN EUROPE

Exports to Western Europe grew by 5% to $370 million in 1988. Exports to the European Community totalled $330 million in 1988, or 89% of the Western European total. The proportion was roughly the same as in the previous year.

The Netherlands repeated as Alberta's top Western European market, importing $110 million in goods. This was a strong 35% increase over the previous year. Since 1985, exports to the Netherlands have increased by two and a half times. It is important, however, to note that this country is somewhat of an anomaly in that it contains a number of commodity brokers who purchase goods to keep in stock for buyers throughout the European Community. As such, some of the exports of Alberta merchandise shown as destined for the Netherlands were ultimately shipped to other European nations. The number one product shipped to the Netherlands in 1988 was styrene ($42 million).

The United Kingdom maintained its position as the second major buyer of Alberta products in Western Europe. Exports to this country rose by 16% to $64.2 million. The largest export commodity was wheat, sales of which increased by 66% to $30.1 million. Exports of components for radio, television, radar and related items accounted for $6.2 million, or 10% of the total.

Exports to France expanded impressively by 44% to $42.7 million in 1988. The top export was sulphur, which experienced an 84% increase in value to $25.8 million. Horse meat was the number two export, increasing by 9% to $11.9 million.

Eastern Europe

Total exports to Eastern Europe increased by 28% in 1988. This was accountable to the gains made in the U.S.S.R., which increased its imports of Alberta products by 38% in dollar terms. Of the eight other countries in this region, two registered an increase in purchases of Alberta goods: East Germany (16.4%) and Poland (47%).

The U.S.S.R. was the second largest buyer of Alberta wheat in 1988, increasing its imports by nearly two-thirds to $220 million. Electrical control panels were the most important export to the U.S.S.R. after wheat in 1988.

Exports to East Germany expanded by 16% in 1988 to $13.8 million, as it maintained its position as Alberta's second largest East European market. Barley was the number one commodity exported to this country ($10.1 million) followed by wheat ($3.1 million).

The top export to Poland in 1988 was pentaerythritol, one of the primary uses of which is in the manufacture of cigarette filters. Poland imported $3.9 million of this product in 1988.

Mobile concrete mixers ($1.5 million) were the most important export to Yugoslavia in 1988. This contrasted with 1987, when sulphur comprised almost the total value of Alberta exports to this country. Although the value of exports to Yugoslavia declined in 1988, Alberta diversified its export mix to this country. Sulphur was not even shipped there in 1988, when all the products imported from Alberta were manufactured goods.

Alberta Exports to Eastern Europe
($000's)

	1985	1986	1987	1988

Middle East

Total exports to the Middle East declined by 10% to $179.5 million in 1988. This was primarily because of reduced exports to Saudi Arabia and Israel.

Iraq became the top export market for Alberta in the Middle East, buying $49 million in goods, 99.9% of which was wheat. Wheat exports to Iraq more than doubled over 1987. Strong gains were also made in the United Arab Emirates (tenfold increase), Ethiopia (60%) and Libya (52%).

Exports to Saudi Arabia decreased by 35% to $44.3 million in 1988. This is attributed to the drop in barley exports from $67.6 million in 1987 to $42.7 million in 1988. However, this total was still significantly higher than for 1986.

Exports to Iran increased by 5.7% to $33.4 million in 1988. Wheat ($27.7 million) comprised 83% of this total. Barley exports totalled $2.2 million. The remainder of the commodities shipped there were manufactured items.

Wheat exports to Libya increased by 65% to $3 million in 1988, making it the top Alberta export to this country. However, the remaining 19 of the top 20 exports to Libya were all manufactured goods.

Exports of manufactured goods made up almost the entire (99%) value of commodities exported to the United Arab Emirates in 1988.

Other Africa

Alberta exports to other African nations improved by 24% in 1988, to $383 million. Morocco led the way by increasing its imports of Alberta goods by 25% to $225 million. Morocco continued to be the largest importer of Alberta sulphur, as this product represented 98% of the total export value to that country. South Africa also purchased mostly sulphur, as exports of this commodity made up 97% of the total. Exports to Tunisia also had a similar structure.

Algeria was the only one of the major export markets in this region to differ from this sulphur-dominated trend. Exports to Algeria consisted primarily of wheat, which comprised 78% of the total.

OCEANIA

Alberta exported $118.5 million in goods to the Oceanic region in 1988. Two countries received nearly all of these: Australia, which imported $100 million of the total, and New Zealand, which accounted for a further $16.8 million.

Exports to Australia increased by 17% from 1987 to 1988. This country has become a very diversified market, even though the top two commodities Australia imported from Alberta in 1988 (sulphur and polyethylene) represented nearly three-quarters of the total. Australia imported a wider range of Alberta products than the People's Republic of China and South Korea put together. Five of the top seven exports to Australia were petrochemical products, totalling $32.3 million.

The top two commodity exports to New Zealand were also sulphur and polyethylene. These two products made up 89% of Alberta's total exports to this country. Polyethylene exports to New Zealand increased by 68% in 1988.

South America

The most important export market in this region remains Brazil, even though it has nearly halved its imports from Alberta since 1985. The major factors in the decline have been sulphur, exports of which have dropped by 39% since 1985, and wheat, exports of which diminished from $71.4 million in 1985 to $306,000 in 1988. This was partly the result of agreements between Brazil and Argentina that were designed to expand trade between these two countries. Sulphur remained the number one export product to Brazil in 1988 ($56.3 million) while coal was second ($34.3 million). Coal exports more than doubled between 1987 and 1988.

Exports to Venezuela increased by 37% to $22 million in 1988. 94% of the total consisted of wheat. Exports of wheat to Venezuela nearly doubled between 1987 and 1988 to $20.6 million.

Exports to Columbia increased by 10% to $17.4 million in 1988. Wheat comprised 64% of this total, as exports of that commodity increased by 136% over 1987. Barley exports totalled $2.15 million in 1988, or 12% of the total.

Exports to Chile totalled $13.5 million in 1988, a drop of 15% from 1987. This was because sulphur exports decreased by $3.9 million from 1987 to 1988. However, non-sulphur exports to Chile increased by 52% from 1987 to 1988.

Alberta Exports to South America

CENTRAL AMERICA

Exports to Central America and Antilles fell by 10.7% between 1987 and 1988 to $155 million. This was in contrast to the 1987 performance, when this was the fastest-growing region of all. While Mexico was the reason for the tremendous growth in 1987, it was also the reason for the decrease a year later. In 1988, total Alberta exports to Mexico fell by 25% to $77 million. The two top exports to Mexico, sulphur and canola seed, experienced decreases in export values of 33% and 42% respectively. However, exports to Mexico were still three times higher than in 1986 and more than four times greater than in 1985.

Cuba continued as the second largest Central American market in 1988, although exports to that country declined by 6% to $44 million, as wheat exports slipped by 7% to $36.6 million. Sulphur exports also decreased, by 59% to $2.3 million. However, exports of fruits, vegetables and preparations penetrated the Cuban market in 1988, for a total of $2.9 million, whereas there were none to this country in 1987.

Nicaragua opened up as an export market in 1988, as exports to this country surged from $91,000 to $7.3 million. Bean exports, totalling $7.13 million, accounted for most of the total.
